

JOHN MATTHEW TOLENTINO

tolentino.jm@live.com – +639271650882 – Remote - Philippines – www.toljm.dev

TECHNICAL SKILLS

- Programming: C# .NET, SQL, JavaScript/TypeScript (Next.js, React, jQuery), REST API, Microservices, Websockets (SignalR)
- Workflow Automation: n8n (workflow design, custom node development), AI Agents, Integrations
- Integrations: APIs, Webhooks, Authentication, Payment Gateways (Stripe, Authorize.NET), Tax Compliance, Notarization
- Cloud Platforms: AWS - EC2, S3, Lambda, etc., Azure - App Services, Service Bus, etc., Railway, Netlify
- Software Development: SCRUM/Agile Methodologies, CI/CD, Unit Testing, BDD/TDD, Version Control
- Data Engineering: ETL/ELT, Data Warehousing, Powershell, SSIS

WORK EXPERIENCE

Freelance

Workflow Automation Developer

Remote

- Designed and deployed n8n-based automation workflows for small to medium businesses to reduce manual tasks and increase efficiency.
- Developed custom n8n nodes for proprietary and third-party API integrations, ensuring seamless connectivity across business systems.
- Delivered API orchestration projects integrating payment platforms, CRM tools, and internal services
- Created modular workflow templates for reusable automation patterns, enhancing scalability and maintainability.

Anytime Mailbox

Fullstack Software Developer

August 2020 – Present

Remote

- Built and maintained robust front-end (web/mobile) and back-end solutions using C#, JavaScript, T-SQL, and APIs to meet business needs and tackle complex issues.
- Integrated third-party APIs to support payment processing, tax compliance, and critical business workflows.
- Collaborated with cross-functional Agile teams to deliver high-quality, timely solutions aligned with business goals.
- Acted as the platform's Subject Matter Expert (SME), providing expert guidance and support for resolving complex issues and ensuring system reliability.
- Executed end-to-end system migration to Azure, modernizing architecture and enabling cloud-native capabilities.

Infor PSSC, Inc.

Associate Software Engineer

April 2019 – August 2020

Taguig, Manila, PH

- Designed and maintained data warehousing and ETL processes using SSIS, enhancing data accessibility and reliability for business intelligence purposes.
- Developed and optimized applications with C#, VB.NET, and T-SQL, meeting critical data processing requirements and ensuring consistent client satisfaction.

- Built automation tools to streamline workflows, leveraging PowerShell and the .NET Framework to improve process efficiency.
- Actively contributed to Agile team initiatives, supporting continuous improvement in software development practices and outcomes.

Accenture Inc.

Associate Software Engineer

October 2017 – April 2019

Taguig, Manila, PH

- Engineered a data-driven analytics website, utilizing ReactJS, Web API, and T-SQL, providing clients with actionable insights through intuitive, data-rich dashboards.
- Executed ETL processes and report generation with SSIS and SSRS, integrating analytics capabilities within cloud environments.
- Developed and implemented automation scripts for cloud server management (AWS, Azure), optimizing infrastructure monitoring and maintenance.
- Engaged with an Agile/Scrum team, collaborating on global projects to ensure timely, high-quality deliverables for multinational clients.
