John Matthew Tolentino

FULLSTACK SOFTWARE DEVELOPER

tolentino.jm@live.com | +63 927 165 0882 | www.toljm.dev | linkedin.com/in/tolentinojm | Remote — Philippines

PROFILE

Fullstack Software Developer with 8+ years building web applications, APIs, and cloud systems in C#/.NET and JavaScript — most recently on a live SaaS product handling payment infrastructure and cloud migration at scale. I'm comfortable owning features end-to-end across the stack, and have spent meaningful time on the infrastructure and automation side as well. I work well in distributed Agile teams and have a track record of stepping into architecture and mentoring roles on the teams I've been part of.

PROFESSIONAL EXPERIENCE

Fullstack Software Developer
August 2020 – Present

Anytime Mailbox — *www.anytimemailbox.com, Remote*

- Led payment integration work with Stripe and other payment gateways — built out subscription billing, one-time charges, refunds, proration, and webhook event handling, replacing a slow in-house billing system and opening the platform up to future products.
- Worked across all three sides of the platform — customer-facing features (mailbox management, billing self-service), operator tools (mail handling workflows), and admin dashboards (account management, reporting, configuration).
- Contributed to the Azure cloud migration — wrote the data migration code to move hundreds of thousands of historical records to the new cloud environment.
- Day-to-day work is primarily in ASP.NET and an internal framework built up over time — C#/.NET on the backend, JavaScript and jQuery on the frontend, T-SQL and SQL Server for database.
- Own the third-party integration layer: tax compliance APIs, webhook pipelines, and a handful of external service connectors that need to stay in sync with the core platform.
- Became the internal point of contact for platform architecture questions — reviewed PRs, ran knowledge-sharing sessions, and helped 10+ engineers get up to speed on the cloud-migrated codebase.

Associate Software Engineer
April 2019 – August 2020

Infor PSSC, Inc. — *Taguig, Manila, Philippines*

- Worked on a Data Warehouse Designer tool built in C# and VB.NET — an internal application that lets users visually design and generate SSIS packages, simplifying the data warehousing process without hand-coding ETL pipelines.
- Heavy T-SQL work across both cloud and on-premises SQL Server environments — wrote stored procedures, reporting queries, and data transformation logic to support the generated SSIS packages and downstream BI reports.
- Automated several recurring ops tasks with PowerShell scripts, cutting the team's weekly manual maintenance work noticeably.
- Part of an Agile squad that pushed for better sprint habits — picked up technical debt alongside feature work rather than deferring it.

Associate Software Engineer
October 2017 – April 2019

Accenture Inc. — *Taguig, Manila, Philippines*

- Built an analytics dashboard in ReactJS and Web API that replaced a manual client reporting process — gave stakeholders a live view of their data instead of waiting on weekly exports.
- Designed and built ETL pipelines and SSRS reports as part of a data integration project spanning both Azure and AWS environments.
- Wrote cloud infrastructure automation scripts for AWS and Azure in support of the environment delivery team — reduced the number of manual environment checks and provisioning steps the team ran each week.

- Monitored a fleet of 10,000+ servers to verify sites were up, meeting performance benchmarks, and compliant with infrastructure standards.
- Worked in a global Scrum team across multiple timezones — got comfortable with async-first collaboration and documentation quickly.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

C# | .NET / ASP.NET Core | JavaScript | TypeScript | React | Next.js | Node.js | VB.NET | Entity Framework / EF Core | T-SQL | HTML / CSS

API & ARCHITECTURE

RESTful API | Microservices | Event-Driven Architecture | GraphQL | SignalR / WebSockets | RabbitMQ | Apache Kafka | Swagger / OpenAPI

INTEGRATIONS & PAYMENTS

Stripe | Authorize.NET | Billing & Subscriptions | Tax Compliance APIs | Webhooks | OAuth / JWT

CLOUD & DEVOPS

Azure App Services | Azure Functions | Azure Service Bus | AWS EC2 / S3 / Lambda / RDS | Docker | CI/CD Pipelines | Cloud Migration

DATABASE & DATA ENG.

SQL Server | PostgreSQL | CosmosDB | MongoDB | Redis | ETL / ELT | SSIS | SSRS | Data Warehousing | Performance Tuning

OBSERVABILITY Azure Application Insights | Azure Monitor | Sentry | Datadog

AI & LLM INTEGRATION Github Copilot | Claude Code | OpenAI API | LangChain | AI Agents | n8n

PRACTICES & TOOLING

Agile / Scrum | Git / GitHub / GitLab / Azure DevOps | xUnit / NUnit | TDD / BDD | Technical Mentoring | PowerShell

EDUCATION

Bachelor of Science in Information Systems *2016*

De La Salle University – Lipa
