

John Matthew Tolentino

FULL STACK SOFTWARE DEVELOPER

contact@jmtol.dev | +63 927 165 0882 | jmtol.dev | linkedin.com/in/tolentinojm | Remote — Philippines

PROFILE

Full Stack Software Developer with 8+ years building SaaS products, internal tools, and cloud-backed applications across C#/.NET, JavaScript, SQL Server, and Azure. Experienced in delivering end-to-end features across frontend, backend, data, and integrations, with hands-on work spanning customer-facing experiences, internal operations tooling, and admin platforms. Brings strong ownership in mature production systems, with experience in cloud migration, external service integration, architecture support, and mentoring engineers in distributed Agile teams.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer

August 2020 – Present

Anytime Mailbox — www.anytimemailbox.com, Remote

- Delivered end-to-end features across the full product surface: customer self-service flows, internal mail-handling tools, and admin dashboards used for reporting, configuration, and account operations.
- Develop APIs and microservices across C#/.NET, ASP.NET, JavaScript, jQuery, T-SQL, and SQL Server in a mature production codebase serving a live SaaS business.
- Own core integration points spanning tax compliance services, event-driven webhooks, and external platform connectors that must stay reliable and synchronized with the main application.
- Wrote migration tooling used to move hundreds of thousands of historical records into Azure as part of the company's cloud modernization effort.
- Led the rebuild of a critical billing subsystem using Stripe and other gateways, introducing a more scalable microservices-based foundation for subscriptions, charges, refunds, proration, and webhook processing.
- Act as a go-to engineer for architecture and onboarding, reviewing pull requests, running knowledge-sharing sessions, and helping 10+ engineers ramp on the cloud-migrated platform.

Associate Software Engineer

April 2019 – August 2020

Infor PSSC, Inc. — Taguig, Manila, Philippines

- Built features for a Data Warehouse Designer application in C# and VB.NET, helping users visually create SSIS packages instead of hand-coding ETL workflows.
- Developed stored procedures, reporting queries, and transformation logic in T-SQL across both cloud and on-premises SQL Server environments.
- Automated recurring operational tasks with PowerShell, reducing manual maintenance effort for the team.
- Contributed in an Agile squad that addressed technical debt alongside roadmap work to keep delivery sustainable.

Associate Software Engineer

October 2017 – April 2019

Accenture Inc. — Taguig, Manila, Philippines

- Built a React and Web API analytics dashboard that replaced manual client reporting with live, self-serve visibility into operational data.
- Designed ETL pipelines and SSRS reporting solutions for a data integration program spanning Azure and AWS.
- Created AWS and Azure automation scripts that reduced manual provisioning and environment validation work for the delivery team.
- Supported monitoring and compliance checks across 10,000+ servers, helping verify availability, performance, and standards adherence.
- Collaborated in a global Scrum team across time zones, strengthening async communication and documentation practices.

TECHNICAL SKILLS

FRONTEND & BACKEND

- JavaScript
- TypeScript
- HTML / CSS
- React
- Angular
- Next.js
- Node.js
- C#
- .NET / ASP.NET Core
- VB.NET
- Entity Framework / EF Core

APIS & INTEGRATIONS

- RESTful API
- OAuth / JWT
- Webhooks
- Swagger / OpenAPI
- GraphQL
- Event-Driven Architecture
- SignalR / WebSockets
- Microservices
- RabbitMQ
- Apache Kafka

CLOUD & DELIVERY

- Azure App Services
- Azure Functions
- Azure Service Bus
- AWS EC2 / S3 / Lambda / RDS
- Docker
- CI/CD Pipelines
- Cloud Migration
- Azure Application Insights
- Azure Monitor

DATA & PERSISTENCE

- T-SQL
- SQL Server
- PostgreSQL
- CosmosDB
- MongoDB
- Redis
- Performance Tuning
- ETL / ELT
- SSIS
- SSRS
- Data Warehousing

DOMAIN EXPERIENCE

- SaaS Platforms
- Admin Dashboards
- Internal Tools
- Third-Party Integrations
- Billing & Subscriptions
- Tax Compliance APIs

PRACTICES & TOOLING

- Git / GitHub / GitLab / Azure DevOps
- xUnit / NUnit
- Agile / Scrum
- Technical Mentoring
- PowerShell
- GitHub Copilot
- Claude Code
- OpenAI API
- LangChain

EDUCATION

Bachelor of Science in Information Systems
De La Salle University – Lipa

2016
